## QuikRentals Property Manager

QuikRentals Property Manager is one of those applications that help you out with your daily work for a fraction of its real cost. QuikRentals Property Manager replaces the need for a paper checking account, you get the ability to check bank accounts using the program. You can access your checking account with a password and you can do some basic calculations with the money that you receive. You can also receive money from your bank and transfer it to a bank account or credit account. A bank account is attached to the program to let you record your bank transaction. You can retrieve online bank account information and you can view it in reports. You can enter your bank

---

account into the program, enter a password and you can browse all your checking account transactions in a tidy and clean way. QuikRentals Property Manager Features: QuikRentals Property Manager shows you an outline of your balance and activity. You can find out how much is available, how much is spent and how much is owed. You can see the total amount of transactions that have been made, the count of those transactions and what day they occurred. You can divide your balance by the number of days to find the rate at which the money has been spent. You can enter any transaction to date and it will be subtracted from the balance or added to it. The history tab gives you an overview of all the different transactions that have occurred. You can filter transactions

---

based on the date of the transaction and you can view transactions grouped by type, category or from your most recent to the oldest transaction. You can group transactions by category, the category can be how much is spent, how much is owed, how much is available or by a combination of these. The average per transaction section allows you to view the average amount of money spent per transaction. You can even get a summary of all the transactions that have occurred in a particular category. You can record and enter new transactions. You can keep track of your most active transactions. You can print transactions. QuikRentals Property Manager is another little application that can help you save time and money. It may not be the best solution for everybody but it is

---

definitely one you should consider.  
QuikRentals Property Manager Review:  
□ QuikRentals Property Manager is a Windows application that is available at QuikRentals.org that can be downloaded at no cost.

#### **What's New in the QuikRentals Property Manager?**

A quick rent checker that goes beyond the ordinary. Quickly check the latest rent, ongoing rent or next rent payments for rental properties. Quickly access information such as rent due date, last rent paid and outstanding rent payments. Check for accurate and updated property information including address, owner, contact information and more. This is a very simple program. It's not meant to be a replacement for OCR (Optical

---

Character Recognition) system. A list of all the properties that you manage will be available and you can easily record any new rental properties. The program uses MS Access database. This allows you to continue your work with your other applications. Any type of report can be requested from the data. You can also access the database as SQL directly to import/export data. What's new in this version: Added support for interest on items and deductions such as rent and mortgage interest. Thanks to the feedback we are opening up the database for the developers. There are over 6100 line items in it. You can enter new Property, Note and Expense type lines and view the ones that are already on the database. Added note that the program was a Classic ASP 4.01

---

version (soon we will make the source code public) Added support for QuickBooks 2005 and 2010. Please send us your feedback on the program.

How to Install: 1. Download the.msi package of QuikRentals Property Manager. Save it to your hard drive (from the browser window, right click on the webpage where you downloaded the file and select "Save target as...") 2. Run the downloaded.msi package. It will start installing itself. 3. When it finishes you will see the software icon in the system tray. 4. Close the installer. 5. Double-click the QuikRentals Property Manager icon in the system tray and start using it.

Quick Start: 1. The program starts with the main screen. It has the icon of your software with an overview of all your properties and notes. 2. As a

---

default you see the list of all your properties. 3. The properties with rent due date and outstanding rent are highlighted in orange. 4. You can see the list of managers with properties and notes listed. 5. You can perform bulk actions such as adding a property, updating the rent due date, tagging or deleting a property, checking-in or out a property,
